In this task, you use EC2 instance connect to log in to the bastion host that you just created.
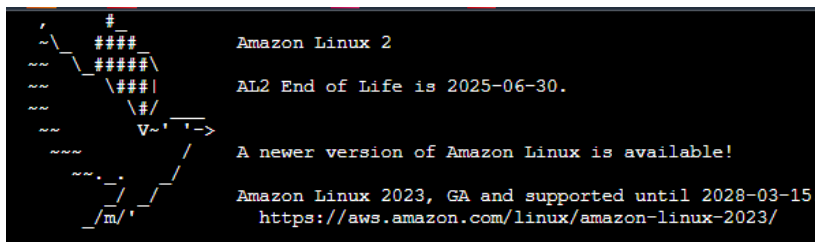

On the **EC2 Management Console**, from the list of EC2 instances displayed, choose the check box for the **bastion host** instance and then choose **Connect**:

On the **EC2 Instance Connect** tab, choose **Connect** to connect to the bastion host:

Now that you are connected to the bastion host, you can use the AWS CLI to call AWS services:

End of Task 2!
